

# A MIDSUMMER NIGHT'S DREAM

## DESIGN PROPOSAL

Scenery: a 1960s VW Campervan sits on stage, tyres deflated, its roof covered in moss. It is as if it has sat parked in a forest, unmoving, for thirty years. From the van are brought the necessary items for the performance — deckchairs, the bench seats from the van, umbrellas and camping tables, a record player, a windbreak, washing lines, tarpaulins... There is also a stage of rotten planks that can be assembled in pieces that come from behind the van. The stage measures 3 metres deep by 4 metres wide. The van has two awnings, that are rigged from the side and rear of the van. Also a roofrack, and a ladder behind giving access to the roof.
